## We're Fanatical About Testing... And Delivering **Advanced Protection®** For Your Home

### We're 100% Committed To The Protection Of Your Most Valuable Asset

When you install a GAF **Advanced Protection® Shingle**, you're getting the very best combination of **weight and performance** that modern technology and extreme testing can deliver. In fact, we perform over 185 individual tests in the making of our Advanced Protection® Shingles.

**No one makes a better asphalt shingle** for:

- ✓ Toughness
- ✓ Wind uplift resistance
- ✓ Flexibility
- ✓ Fire resistance

GAF Shingles were the first to pass the industry's two toughest wind-resistance tests: ASTM D3161, Class F (110 mph [177 km/h]) and ASTM D7158, Class H (150 mph [241 km/h]).\*

On average, wind causes more than \$9 billion in residential property damage each year in the U.S.\*\*

### And Now, We've Taken Shingle Quality To A Whole New Level: AC438

AC438 is the first set of tests for shingles that uses advanced science to predict long-term shingle performance in three critical areas:

**Long-term durability:** How your shingles perform after long-term exposure to the sun (the #1 enemy of your shingles).

**Wind-driven rain performance:** How your shingles will stand up to heavy, driving rains.

**Long-term extreme-temperature resistance:** How your shingles withstand extreme temperatures—like the cold of winter in Montana or the heat of summer in Arizona.

We're pleased to announce that **all of GAF's Shingles have passed the requirements of AC438.** GAF Shingles were the first to pass these torturous tests. We think Mother Nature would be impressed!

\*Testing performed under controlled laboratory conditions.  
\*\*Based on Verisk Climate data for 2010-2014.

*Thermo-gravimetric Analyzer  
evaluates asphalt ratios  
to ensure durability*

*Dynamic Mechanical Analyzer  
measures flexibility and toughness*

*Dynamic Shear Rheometer  
provides critical data  
for shingle optimization*

# What Does **Advanced Protection® Technology** Mean To **The Experts?**

Some people think that asphalt shingles are just a low-tech (albeit highly effective) roofing material.

But now, GAF has turned the art of making roofing shingles into a science with its Advanced Protection® Shingles. Utilizing some of the most advanced design, manufacturing, and testing techniques available in any industry (including computer simulation technology originally developed for the Space Shuttle), the result is today's most advanced roofing technology—which is now available to consumers to help protect their homes.

## Compare GAF's Advanced Protection® Shingles To Old-Fashioned Shingles...

	GAF Advanced Protection® Shingles	Old-Fashioned Shingle Technology
<b>Fiberglass Mat</b> (the "heart" of the shingle)	<ul style="list-style-type: none"> <li>Low-profile technology includes a proprietary orientation of glass fibers, for maximum strength and durability</li> </ul>	<ul style="list-style-type: none"> <li>Typically requires the application of excess asphalt (weight) to meet minimum industry requirements</li> </ul>
<b>Asphalt</b> (provides waterproofing performance)	<ul style="list-style-type: none"> <li>Advanced process control allows us to optimize the critical top (i.e., weathering) layer for long-term performance against severe weather</li> </ul>	<ul style="list-style-type: none"> <li>Excess asphalt applied to bottom (i.e., non-weathering areas) increases shingle weight with no added benefit</li> </ul>
<b>Filler</b> (mixed with the asphalt to bind components)	<ul style="list-style-type: none"> <li>Premium limestone content optimized for maximum toughness and wind resistance</li> <li>Unnecessary limestone eliminated</li> </ul>	<ul style="list-style-type: none"> <li>Unnecessary fillers used to artificially increase shingle weight—with no benefit in performance</li> <li>Very excessive filler can even increase the risk of shingle cracking</li> </ul>
<b>Adhesive</b> (seals shingles on roof)	<ul style="list-style-type: none"> <li>Proprietary Dura Grip™ Adhesive locks shingles tightly in place to reduce risk of shingle blow-off</li> <li>Allows <u>every</u> GAF Shingle to pass the industry's two toughest wind tests (ASTM D3161, Class F, 110 mph [177 km/h] and D7158, Class H, 150 mph [241 km/h])*</li> </ul>	<ul style="list-style-type: none"> <li>May not meet highest wind resistance tests (ASTM D3161, Class F, 110 mph [177 km/h] and D7158, Class H, 150 mph [241 km/h])</li> </ul>

LIFETIME HIGH DEFINITION® SHINGLES

"North America's  
#1-Selling Shingles!"

"There's nothing  
quite like a genuine  
**Timberline®**  
**High Definition®** roof!"

Your roof can represent up to **40%** of your home's "curb appeal." You can improve its resale value with Timberline® High Definition® Shingles from GAF.

Timberline® Shingles with Advanced Protection® Shingle Technology are the **#1-selling shingles** in all of North America. Professional installers have long preferred the rugged, dependable performance that only a Timberline® roof can offer.

But great performance is only half the story. Timberline® High Definition® Shingles not only protect your most valuable asset but also beautify your home for years to come. In fact, an independent research firm surveyed U.S. homeowners about the brand of architectural shingles they preferred based on appearance. The result: **more homeowners preferred the look of Timberline® High Definition® Shingles to the other leading brands!\***

Why settle for anything less?

## What's the **secret** to the striking look of a Timberline® High Definition® roof?

Timberline® High Definition® Shingles are unlike any others, thanks to our proprietary shadow bands. Each shadow band is applied using a sophisticated, computer-controlled "feathering" technique. When combined with our randomly blended top layer, it results in a shingle with exceptional depth and dimension—**and a striking look unmatched by any other brand.**

But don't just take our word for it. See for yourself. When you compare Timberline® High Definition® Shingles to typical architectural shingles, it's easy to see why they'll look sharper and more beautiful on your roof—while enhancing the resale value of your home.

# TIMBERLINE® COOLSERIES®

ENERGY- SAVING SHINGLES

(Not available in Canada)

"Revolutionary  
Cool Roofing!"

## Timberline® Cool Series® Shingles can help reduce cooling energy costs<sup>3</sup>

The revolutionary Timberline® Cool Series® Shingles reflect sunlight to help reduce unwanted attic heat build-up and help save on air-conditioning costs. They are rated by the Cool Roof Rating Council (CRRC) and are ENERGY STAR® qualified (U.S. only).<sup>1,2</sup>

- **Helps Save Money On Cooling Costs...** According to the Cool Roof Rating Council, cool roofs may save you an average of 7–15% on your total cooling costs<sup>3</sup>
- **Rebates...** Some utility companies may provide incentives for using cool shingles

Timberline® Cool Series® Shingles are stocked in Fontana, CA, and Shafter, CA, and are special order in other locations.

<sup>1</sup> All three Cool Colors meet the prescriptive requirements of Title 24, Part 6, of the California Code of Regulations, and meet the Los Angeles Green Building Code.

<sup>2</sup> When installed properly, this product will help reduce energy costs. Actual savings will vary based on geographic location and individual building characteristics. For more information, contact GAF Technical Services at 1-800-ROOF-411, visit gaf.com, or call 1-888-STAR-YES.

<sup>3</sup> Savings depend on various factors including, but not limited to, climate zone, utility rates, location, and HVAC equipment efficiency.

\*The word "Lifetime" refers to the length of coverage provided by the GAF Shingle & Accessory Ltd. Warranty (refer to the actual warranty for complete coverage and restrictions), and means as long as the original individual owner(s) of a single-family detached residence (or the second owner(s) in certain circumstances) owns the property where the shingles are installed. For owners/structures not meeting the above criteria, Lifetime coverage is not applicable.

## How cool?

*Thanks to the reflective nature of Timberline® Cool Series® Shingles, part of the heat radiating from the sun gets reflected, helping to reduce the heat in the attic and heat going into the house. It may translate into savings on air-conditioning bills.<sup>3</sup>*

Get potential insurance savings and extra protection for your most valuable asset!†

- **Potential Insurance Savings...** Shingles pass UL 2218 Class 4, and may qualify for insurance discounts†
- **Excellent Wind Performance...** Shingles are warranted to withstand winds of up to 130 mph (209 km/h)\*
- **Peace Of Mind...** Lifetime Ltd. transferable warranty with Smart Choice® Protection for the first ten years\*\*

- **Ridge Cap Shingles...** Use our Seal-A-Ridge® IR, UL 2218 Class 4 Ridge Cap Shingles. They're a unique color match to GAF Impact-Resistant Shingles.

Note: Always use complementary-color GAF StarterMatch™ Starter Strip Shingles when installing Grand Sequoia® IR Impact-Resistant Shingles for the best look.

## GAF IR Shingles meet the highest impact-resistance rating...

The UL 2218 Impact Test was developed in conjunction with insurance industry leaders. It's based on dropping a 2" (51 mm) steel ball from 20' (6 m) onto the top of a shingle to see whether the shingle cracks (see illustration below). GAF IR Shingles pass Class 4—the highest rating possible. Check with your insurance agent about potential savings on your homeowners insurance.†

What you should also know about the UL 2218 impact test:

- **Forceful Impact...** The test evaluates the shingles' ability to withstand high-velocity impact.
- **Potential Leaks...** When subject to high impact, shingles that pass this test are more likely to prevent leaks into your home.
- **No Warranty Improvement...** GAF's warranty does not cover hail damage even for shingles that pass this test.

U.S. only

†Insurance discounts may not be available in your area. Where available, insurance discounts may vary. Contact your insurance provider for information.

\*This wind coverage requires special installation; see GAF Shingle & Accessory Ltd. Warranty for details.
